### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Maria Gassaway on 6-20-06.

The application has been amended as follows:

In the claims:

Claims 9-14 have been cancelled as being drawn to a non-elected invention, the election having been made with traverse.

2. The following is an examiner's statement of reasons for allowance: None of the prior art of record taught the use of a wet reinforcement fiber in a dry web forming process wherein the wet reinforcing fiber was spread to partially open the wet reinforcing fibers and water was removed from the wet reinforcing fibers to form a dehydrated reinforcement fiber followed by additional dry processing including addition of resin with the dehydrated reinforcement fibers and formation of a sheet from the reinforcement and the resin binder and a thermal treatment on the sheet to form a fibrous mat and/or composite product. The references to any one of Blough et al, Nakazawa et al and Strait et al both suggested that it was known to employ wet strand reinforcement in composite article manufacture however each suggested that one

skilled in the art would have agglomerated the strands to bunch the same together rather than separate the strands apart by opening the same up prior to the drying operation.

The reference to Philipps et al formed a wet reinforcement which was dried subsequent to chopping the strands, however it too failed to teach the opening up of the strands.

The reference to Dong suggested the state of the art regarding wet and dry processing to form reinforcements formed from glass fibers, however it did not envision the use of wet reinforcement in a dry forming operation in the manner claimed by applicant wherein the wet fibers were opened up at least partially prior to dehydration of the fibers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeff H. Aftergut whose telephone number is 571-272-1212. The examiner can normally be reached on Monday-Friday 7:15-345 pm.
